Practical OPNsense

Errata

© 2025 Markus Stubbig

First edition: June 2019, ISBN: 978-3-73863-201-9

Second edition: July 2019, ISBN: 978-3-74810-723-1

- **Page 57** (Chapter 4): Paragraph starting with “Using the example of RT-1...”. The correct IPv4 address of RT-3 is *192.0.2.3* (not: *198.51.100.3*) and the shared network segment is *WAN2* (not: *WAN1*). Figure 4.3 shows the correct addresses.
- **Page 228** (Chapter 16): The IEEE standard for *Link Aggregation* is IEEE 802.3ad (not: IEEE 802.1ad).

Third edition: May 2021, ISBN: 978-3-75430-256-9

Fourth edition: May 2023, ISBN: 978-3-75780-536-4

- **Page 85** (Chapter 7): Paragraph starting with “Create network bridge”. The network bridge is created between the *DMZ* (not: *LAN*) and *WAN2* interfaces.

Fifth edition: April 2025, ISBN: 978-3-81927-648-4

- **Page 106** (Chapter 9): The final rule in Figure 9.4 must *block* or *reject* (not: *pass*).
